Getting Started

Registering, logging in, and finding your way around the portal

Help Centre User Guide

What is CampusSafe Twin?

CampusSafe Twin is the campus safety portal. It lets students report safety incidents with photos and an exact map location, call for emergency help with one tap using the SOS button, plan safer walking routes across campus, and receive notifications as campus security responds.

Role	Who it is for	What they see after login
Student	Any registered student	SOS, Report Incident, My Reports, Safe Route, Notifications
Security Officer	Campus security guards	Security Map, My Dispatches, Patrol Hotspots, Flagged Zones, Safe Route
Supervisor	Security management / site admin	Everything, plus Live Ops, Locations, Staff, Analytics and Simulation

Creating a student account

1. Open the portal in your browser and click **Register** at the top right of the screen.
2. Fill in your **full name**, your **university e-mail address** and your **student number**.
3. Choose a strong password and confirm it.
4. Click **Register**. You can now log in with your e-mail address and password.

> **Important:** Security Officer and Supervisor accounts cannot self-register. They are created by a supervisor on the Staff page. If you are staff and have no account, ask your supervisor.

Logging in and out

1. Click **Login** at the top right of the home page.
2. Enter your e-mail address and password, then click **Login**.
3. The coloured menu bar under the header now shows the pages available to your role.
4. When you are done, click **Logout** at the top right. Always log out on shared or lab computers.

Finding your way around

The purple header at the top shows who is logged in, the grey **? Help** button (which opens this Help Centre), and the Logout button. Below it, the dark navigation bar lists the pages for your role. The **Notifications** link shows a counter like (3) when you have unread messages.

> **Tip:** Lost? Click the CampusSafe Twin logo at the top left at any time to return to the home page, or click **? Help** to come back to the Help Centre and search these guides.
