My Reports & Notifications

Following up on your reports and understanding system messages

Help Centre User Guide

The My Reports page

Everything you have ever reported is listed under **My Reports** in the navigation bar, newest first, with the reference code, category, date and a coloured status badge for each report.

Status badge	Meaning
New	Received, waiting for security to review it.
Acknowledged	Security has seen and accepted your report.
In Progress	An officer is actively busy with it.
Resolved	Closed — the matter was dealt with.

Tip: Open a report to see its full detail and history. Quote the **CS-...** reference code whenever you contact campus security about it.

The Notifications page

The system sends you a notification whenever something relevant happens. The **Notifications** item in the menu shows an unread counter, for example **Notifications (3)**.

Notification type	You receive it when...
Status update	The status of one of your reports changes (e.g. Acknowledged or Resolved).
SOS	There is activity on an emergency alert involving you.
Dispatch	Relevant for security staff — an officer was assigned to an incident.
System	General messages from the platform or campus security.

1. Click **Notifications** in the navigation bar.
2. Unread messages are highlighted. Click a notification to read the detail.
3. Once read, the counter in the menu goes down.

Good to know: Notifications about your own reports mean a real person looked at what you submitted. If a report stays on New for a long time, it has not been forgotten — high-priority incidents are simply handled first.
