CAMPUSSAFE TWIN | CAMPUS SAFETY PORTAL

Supervisor & Admin Guide

Live operations, staff, locations, analytics and the Help Centre

Help Centre User Guide

The supervisor role

Supervisors run the control room and administer the platform. You see every student and officer feature, plus the administration pages described below.

Page	What it does
Live Ops	Real-time operations dashboard: active SOS alerts, open incidents and officer positions.
Security Map	The live campus map with incidents and the heat layer.
Hotspots	Incident clusters per map cell, for planning patrol coverage.
Route Network	The walking-path network used by the Safe Route planner.
Flagged Zones	Review and manage zones officers have flagged as risky.
Locations	Manage campus landmarks (POIs) used as route start/end points — add by clicking the mini map.
Staff	Create and manage security officer and supervisor accounts; deactivate leavers.
Analytics	Trends over time: categories, volumes and response performance.
Simulation	Generate test incidents and runs for training and demos.

Managing staff accounts

1. Open **Staff** in the navigation bar.
2. Add a new officer or supervisor with their name, e-mail and badge number. Give them their starting password securely.
3. Deactivate an account the day someone leaves the service — deactivated users cannot log in.

Keeping the Help Centre up to date

The grey **? Help** button in the header opens the Help Centre. Every user can search and read the guides, but as a supervisor you also see an upload panel at the bottom of the page.

1. Click **? Help** in the top bar.
2. Scroll to **Upload a New Help Guide**.

3. Enter a clear **title** (e.g. "How to Report an Incident") and a one-line **description** — this is what the search box matches on.
4. Pick the best-fitting **category**, choose the **PDF file** (maximum 15 MB), and click **Upload Help Guide**.
5. The guide is visible to all users immediately. Use the **Delete** button on a card to retire an outdated guide.

Important: Only PDF files are accepted, and uploads are limited to 15 MB. Export slides or documents to PDF before uploading.

Tip: Write guide titles and descriptions with the words users would actually search for — "report", "SOS", "route", "password". The Help Centre search matches titles, descriptions and categories.
